Series JASP

Cat No JASP5-01-01-A

Janatics Animation Software for Pneumatics

Features

- Functional animation of products and symbols
- Circuit designing tutorial
- Product description
- Construction of elements

Application

This software package is a handy tool for the trainers in educational institutes & corporate training centres to explain about the products at a very short period, so as to allow the trainees to have ample time on using trainer kits to gain more practical knowledge. The virtual cut sectional animation lets the trainees to know the internal details of the product & to understand the functions simultaneously.

Access Key

The software is delivered with a USB type hardware lock for accessing the software application

This key is the only access to JASP.

Ordering Code: JASP5.0
