

## Hydraulic Trainer Kit (Profile series)

- Sleek, safe, user-friendly and rugged design
- Training exercises based on real life industrial automation scenarios with actual industrial components
- The standard Aluminum based mounting boards not only improves aesthetics, also makes mounting and rearranging components easier, thus enabling the user to concentrate more on experimenting the circuits
- All the components Modules are provided with Quick Coupling / Banana Plugs / Mounting Couplings for quick assembly of components and system
- Upgradation and expansion of trainer kit is possible
- Available with three variants Basic hydraulic trainer kit, Electro hydraulic trainer kit & Electro hydraulic trainer kit with PLC

## Hydraulic Trainer Kit

**Ordering No: JTKH1-1**

The Hydraulic Trainer Kit is designed with capability to demonstrate the design, construction and application of hydraulic components and circuits.

## Electro Hydraulic Trainer Kit

**Ordering No: JTKH2-1**

The Electro Hydraulic Trainer Kit is a stand-alone training kit which integrates Electrical Control technology with pure Hydraulic systems to build Electro-Hydraulic Industrial Automation systems. The design of kits and components supplied facilitates learning and demonstration of Design, Construction, Operation, Trouble shootings and Maintenance of Electro Hydraulic systems in industries.

## Electro Hydraulic Trainer Kit with PLC

**Ordering No: JTKH3-1**

The Programmable Logic Controller (PLC) Trainer Kit for Industrial Automation is stand-alone trainer kit. It integrates Programmable Logic Control technology to build hybrid Automation system with pure Hydraulic and Electro Hydraulic components and modules. PLC provides the flexibility to design and build numerous systems using software and I/O interfaces without changes to the hard wired connections.

**Note:** Aluminium workbench is not a part of the trainer kit. It should be ordered separately. Refer Mountings & Accessories section to choose from wide range of options
